

Enterprise File Sharing
and Sync Requirements
are Complex and
Evolving ...

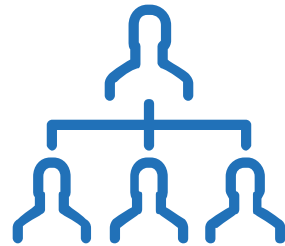

We Offer the Right
Solution for Your
Enterprise Needs!

ENTERPRISE FILE SHARING, SYNC AND COLLABORATION IS CRITICAL TO YOUR BUSINESS

Workplace has become truly digital

Growth in Mobile workforce and BYOD

Business success depends on knowledge sharing across and beyond organization

*High degree of collaboration
Anywhere access to organization knowledge*

Need to balance privacy, data protection and operational risk

YOUR ORGANIZATION NEEDS MORE THAN CONSUMER APPS (DROPBOX, ONEDRIVE, GOOGLE DRIVE)

Data Leak

- How do you ensure your employee don't mix their personal and enterprise data when using Dropbox or OneDrive?

Controls and Admin tools

- Do you know where your data is stored by Dropbox or OneDrive? Do they allow you to use your encryption key?

Ransomware

- Do you know 91% of the ransomware are instantiated via email spoof based on popular consumer apps?

Customization

- Do you prefer your logo and branding or Dropbox's when sharing files outside?

Expensive

- Are you paying for partners/ external users whom you collaborate?

WE OFFER COMPLETE ENTERPRISE FILE SHARING AND SYNC SOLUTION

Remote Access

File Sharing & Collaboration

Admin tools & Control

Security

Customization

FileCloud Sync

FileCloud Drive

Mobile Apps

Office 365 Integration

File locking

Team folders

Full text search

Remote access to network folders

Advanced file sharing

Granular Folder/Sub Folder Permissions

Ransomware protection

Audit

Reports and Analytics

Client management

Mass deployment support

Compliance – GDPR, HIPAA, FINRA

Branch Office synchronization

Workflow automation

REMOTE ACCESS AND SYNC

Securely access your enterprise data from anywhere using any device – without a VPN.

We offer multiple ways to access your organization's files securely via

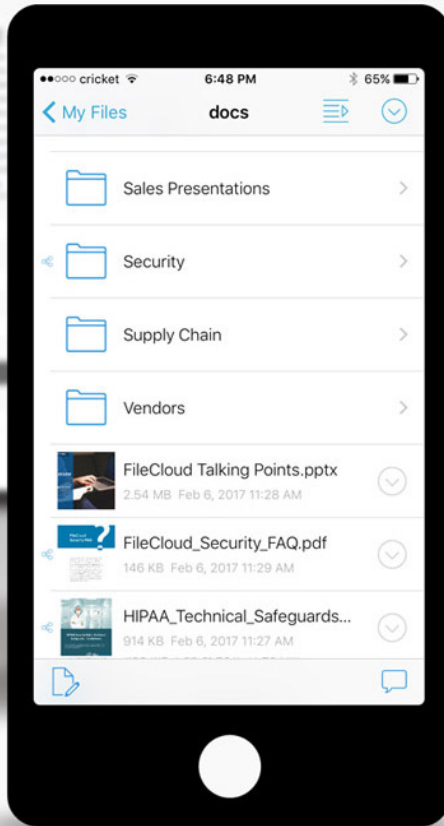

Web access

Sync

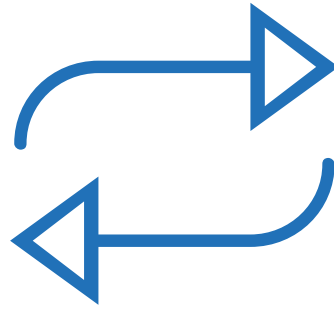

Virtual drive

Mobile apps

Browser add-ons

SYNC YOUR FILES ON ALL YOUR COMPUTERS

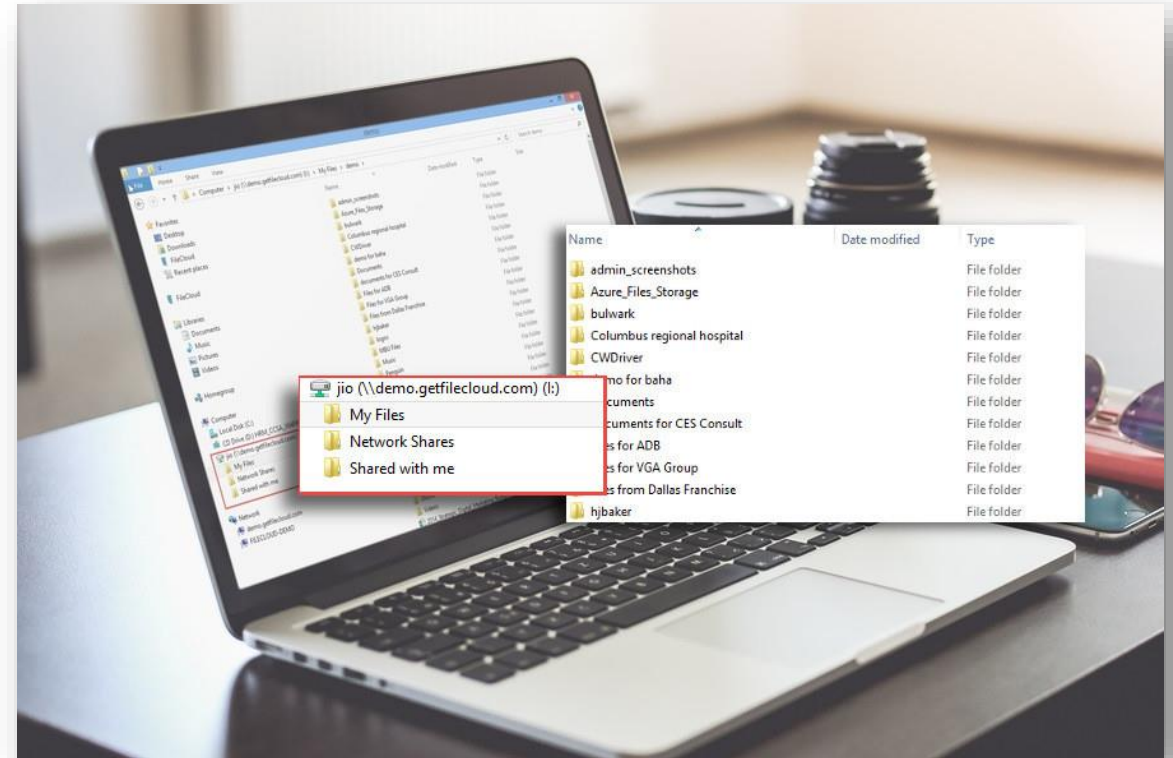

The sync app is the most advanced sync software that can run on Windows, Mac or Linux and securely synchronizes data across OS.

DRIVE - MOUNT CLOUD SPACE AS A LOCAL DISK

Auto magically makes your remote files available as if they were stored in the local drive

- Access remote files
- Easy to use - look and feel same as local files
- Limit offline copies
- Save hard disk space

SECURE FILE SHARING

GRANULAR SHARING OPTIONS

Manage Share for file - Tonido_Case_Study.docx

Share URL: <https://demo.codelathe.com/url/ig05w1ox1mgq>

Share Options

Shared File/Folder

Share Name

Expires (Optional)
☒ Never Expires ☐ Expires

Restrict Downloads (Optional)
☒ No Restrictions ☐ Restrict to

Email File Change Notifications
☒ Yes ☐ No

Share Permissions

☒ Allow Everyone
☐ Allow Selected Users/Groups

Guest

Share permitted for all.

Limit number of
downloads for a
shared file

Automatically
expire a share

Prevent downloads

Allow anonymous
file uploads

INTEGRATION WITH MICROSOFT OFFICE AND OUTLOOK

- Open, edit and save any Microsoft Office files right from your browser
- Our Outlook add-on, you can automatically upload attachments and email them as a link
- Using our Office add-ons, you can open, edit, save files to a remote server or the cloud directly from Microsoft Word, Excel and PowerPoint

'FREE' UNLIMITED CLIENT / PARTNER ACCOUNTS

- Why pay full price (license fee) for light users? We offer 'free' accounts for your clients and partners
- Simplified file sharing - vendors and partners can access all their shared files in one place
- Provides complete audit trail of who accessed what and when.

TEAM FOLDERS

- Team Folders are common folders where teams can store files for collaboration
- Once a Team Folder is shared with a team, the folder is instantly available to all members of the team
- Versatile, granular folder permissions to mimic any kind of file share, and permissions hierarchy
- Allows organizations to manage access permissions at any folder and subfolder level.

POWERFUL ADMIN TOOLS - CONTROL

Data Leak Prevention

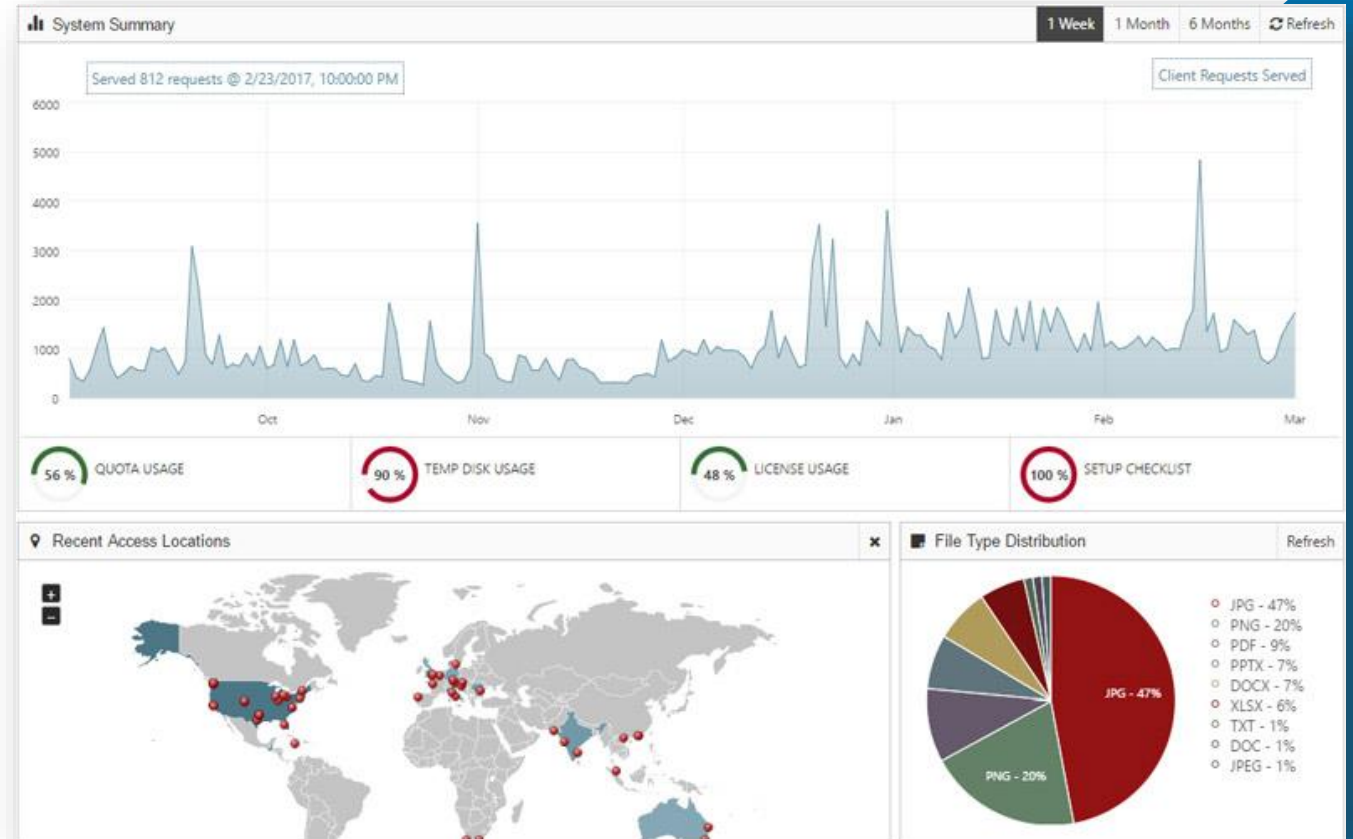

If one of your users lost a mobile device, your administrator can block and remotely wipe the enterprise data off that device, protecting confidential files.

Analytics & Reports

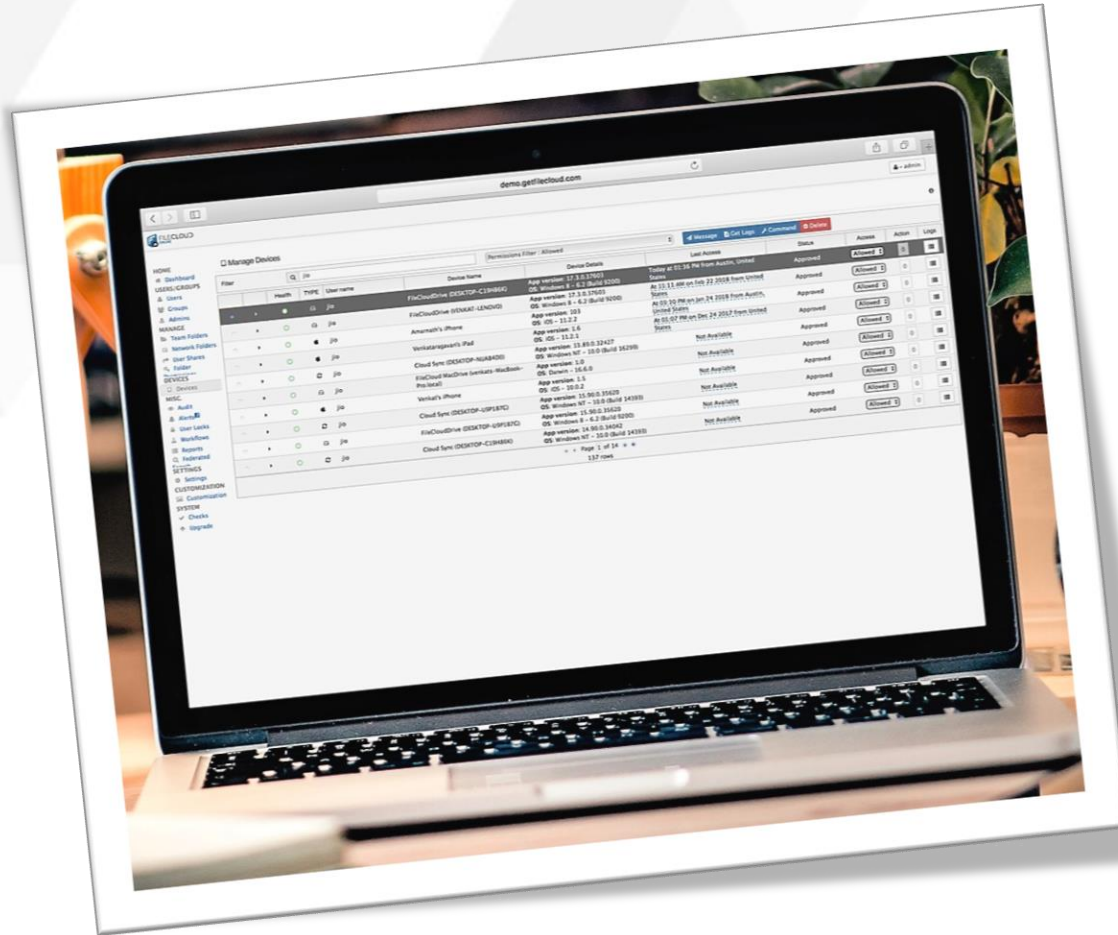

Built-in 'business intelligence layer' - provides insights e.g. usage trends, access by geo, storage usage and content mix etc.

Settings & Workflows

Custom workflows, policies, and settings to control and manage every aspect of the user experience.

POWERFUL ADMIN TOOLS - MONITOR

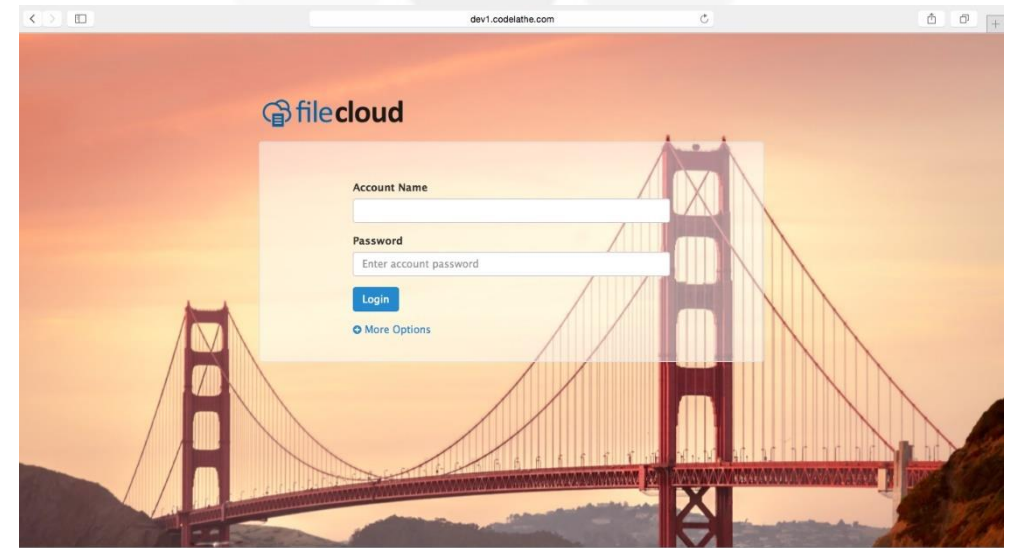

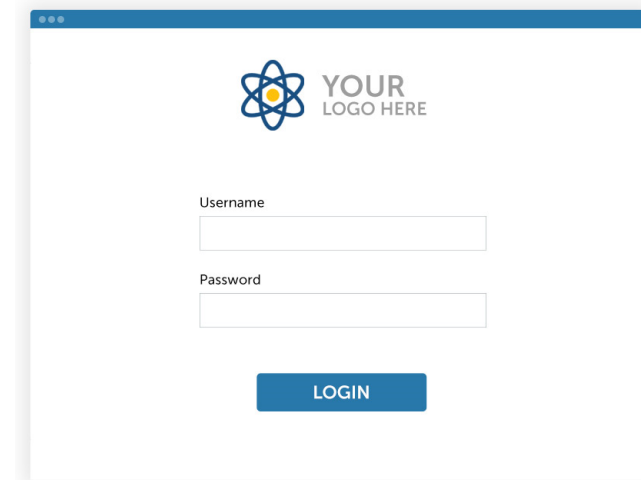

- Manage Devices - Shows detailed inventory of connected devices (PCs, Smartphones and Tablets) for every user. Administrators can block, remote wipe or send messages to connected devices.
- Manage User Files - admins can copy or move files from one user to another user
- Manage File Shares - administrators can monitor and change permissions or remove file share settings created by users to prevent data leak

UNPARALLELED BRANDING OPTIONS

Customize Everything - You can customize

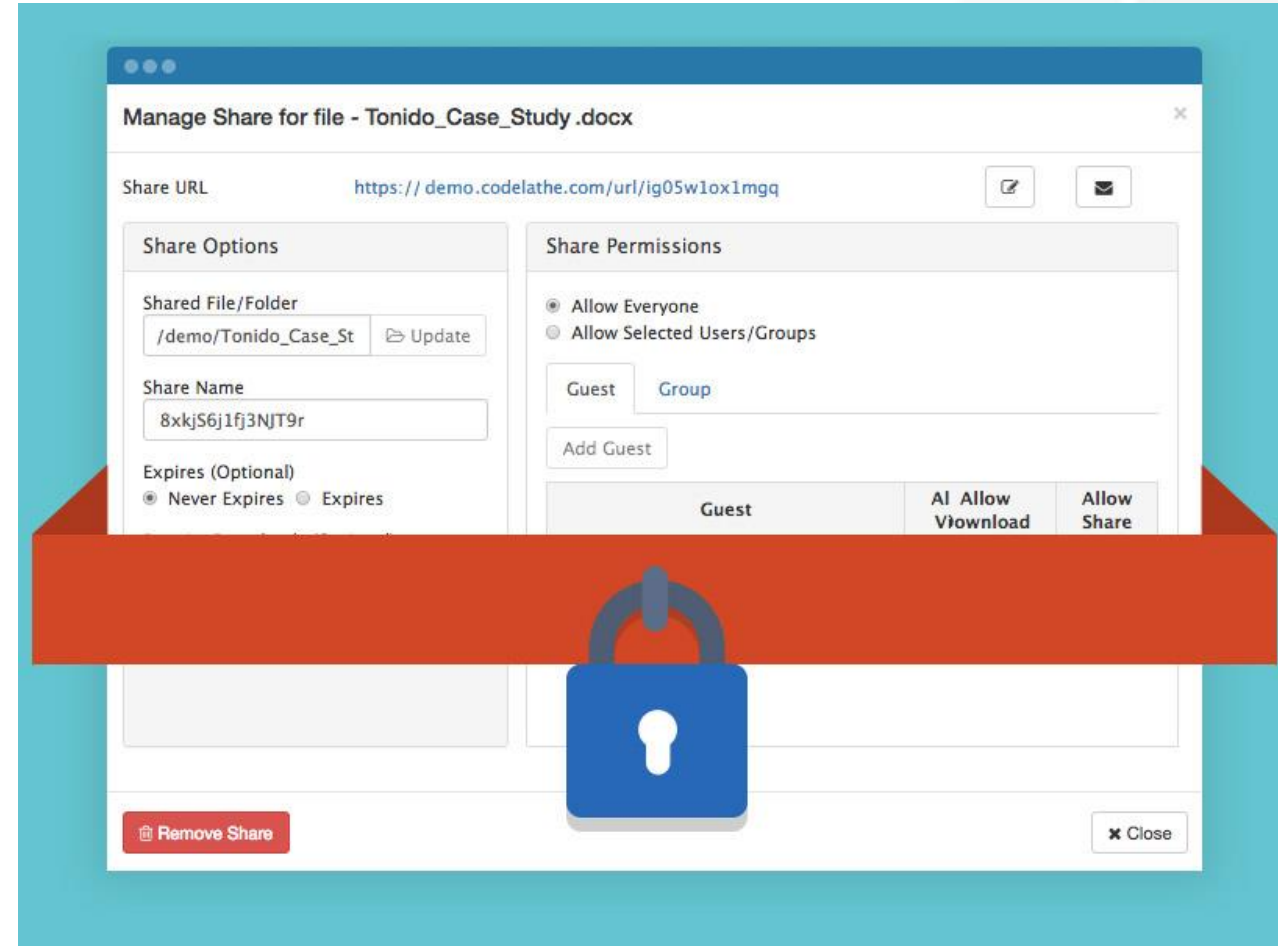

- Logos
- Domain (run on your url)
- Background image of the login page with company products, favorite landmark etc.

Customize any element of the user interface using custom CSS to give a cohesive experience

SECURITY

- Data leak prevention
- Easy-to-configure security policies
- Security
- Two-Factor Authentication (2FA)
- Encryption - modern encryption (AES 256-bit) methods and industry standards to transfer (SSL/TLS secure tunnel)
- Anti-virus

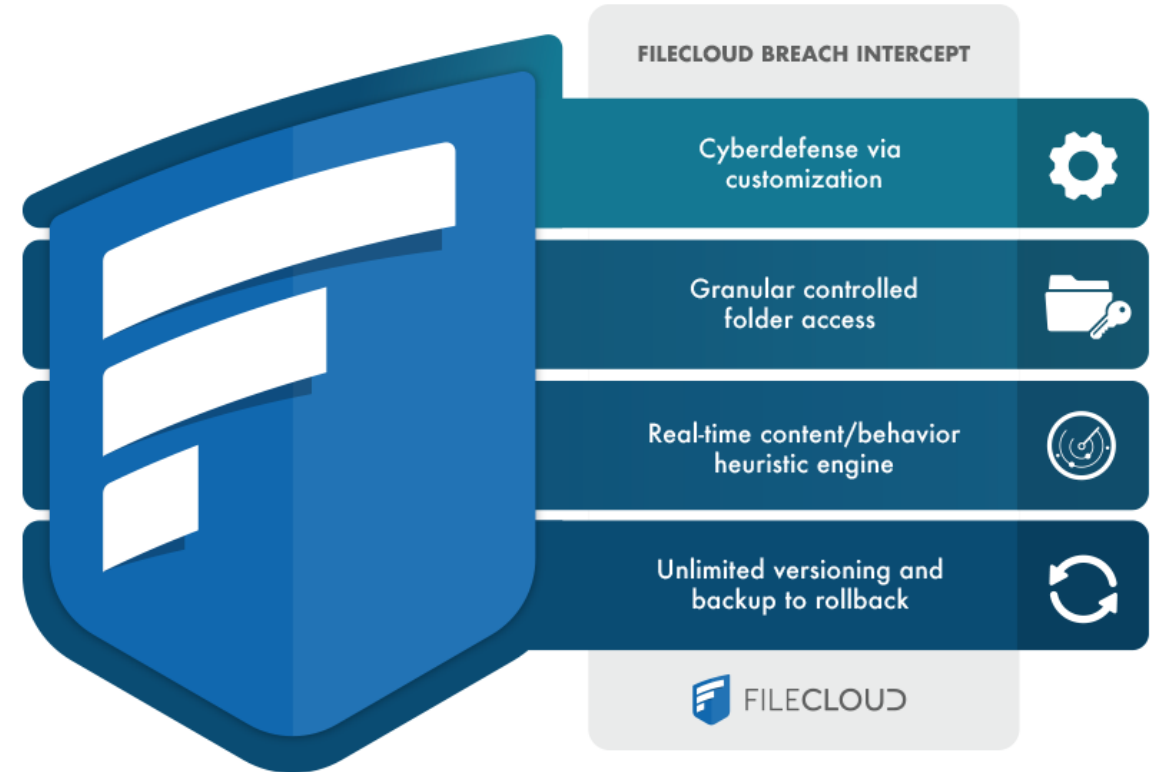

RANSOMWARE PROTECTION

Offers an industry-first heuristic engine to detect ransomware.

Our heuristic engine detects any suspicious activity and stops the upload and sends an alert to the administrator.

Email spoofing is the primary delivery method for malware. You can customize email templates, unlike Dropbox and other public SaaS products.

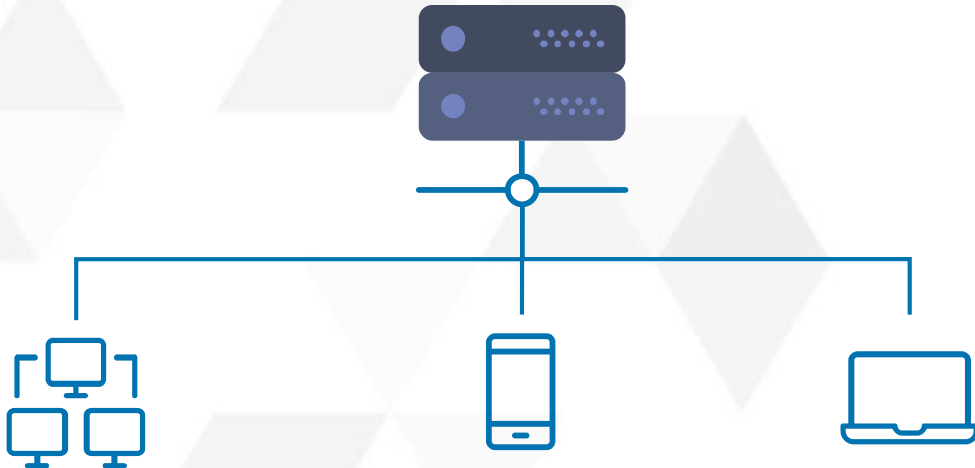

ENDPOINT BACKUP

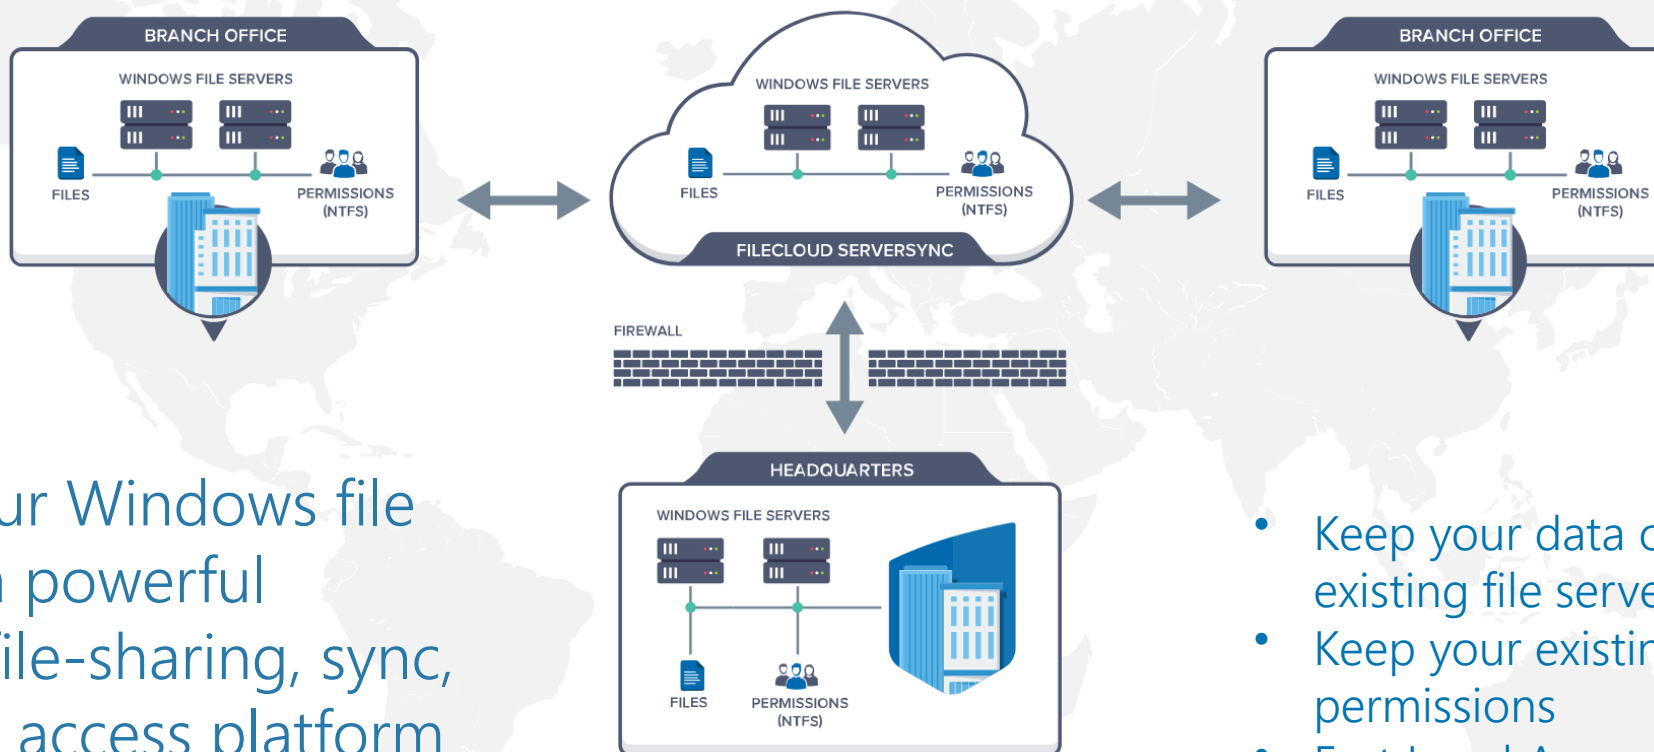

Backup and restore across all platforms (Win, Mac, Linux) and devices (Desktops and Smartphones).

Additional Features

- Automatically backup media files from iOS and Android devices to remote server or the cloud
- Recycle bin allows deleted files and folders to be recovered
- Unlimited File Versioning
- Automatically stores versions files as they change. Easy to retrieve previous versions

HYBRID CLOUD

Convert your Windows file servers to a powerful enterprise file-sharing, sync, and mobile access platform

- Keep your data on your existing file servers
- Keep your existing NTFS permissions
- Fast Local Access
- Synchronizes Permissions
- Flexibility of Hybrid Cloud
