

Zimbra Suite Plus

Made to Expand Your Zimbra Server's Capabilities

Zimbra Company Overview

More than 500 million people trust Zimbra to share what matters most — billions of meetings, messages and memories.

Zimbra provides a low-cost, customizable platform to securely exchange email messages, calendar appointments, contacts, files and task information from desktops, laptops and mobile devices. And now Zimbra Talk provides full-featured text chat and video conferencing.

Zimbra Suite Plus Benefits

Highly Scalable and Perfect for Small and Large Infrastructures

Zimbra Suite Plus is the modular add-on that allows you to extend your Zimbra Server's capabilities on Zimbra Open Source or Network Edition, such as real-time hot backup and restore or mobile push synchronization, with easily affordable options.

Zimbra Backup Plus

Featuring a cutting-edge, real-time engine, Zimbra Backup Plus takes care of backing up every single item and event on your server with split-second precision.

It is specifically designed to avoid data loss by using atomic and ever-consistent algorithms, while still saving disk space thanks to an intelligent deduplication and compression system.

Zimbra Backup Plus features several restore options, ranging from a single-item restore to complete disaster recovery.

All of the restore modes are transparent to the end-user and are 100% independent of the OS and architecture: you can restore data on any supported Zimbra version regardless of the version of the source server.

ZIMBRA SUITE INCLUDES:

- **Zimbra Backup Plus**
- **Zimbra Admin Plus**
- **Zimbra HSM Plus**
- **Zimbra Mobile Plus**

Zimbra Admin Plus

Zimbra Admin Plus is your next step in Zimbra Administration.

Grant Delegated Admin rights to users on your server so they can perform user management tasks, such as setting quotas, modifying COS variables and setting user limits for your domains. This means you can more gracefully handle one of the most delicate tasks of a system administrator: multi-tenancy.

Keep track of both your Delegated Admins' actions and your domain status thanks to the reporting features of Zimbra Admin Plus, which is integrated with the Zimbra Administration Console via the Zimbra Suite Administration Zimlet.

Zimbra HSM Plus

HSM allows you to manage multiple volumes and HSM policies through the Zimbra Suite Plus Administration Zimlet. This Zimlet is completely integrated in your Zimbra Administration Console, giving you the tools to organize and manage your storage effectively.

Spare valuable storage space thanks to a customizable compression threshold and multiple HSM policies, easily expand your Zimbra server by adding new volumes at will, improve your server performances by splitting the I/O load on different storage media and use different tiers of storage equipment.

Zimbra Mobile Plus

Zimbra Mobile Plus allows your users to synchronize their Zimbra mailbox with their mobile devices through the widespread Exchange ActiveSync protocol, natively supported by the vast majority of mobile devices. Whether it is a mobile phone or a tablet, corporate or BYOD, your data will always be at your fingertips, without any middle-ware or dedicated client.

Not just a viewing medium, but a complete communication solution that allows you to send and receive emails, use the Global Address List, fully manage contacts in your Zimbra address book, create appointments, arrange meetings and manage task lists.

About Zimbra

Zimbra, a Synacor brand, connects people and information with unified collaboration software that includes email, calendaring, file sharing, chat and video chat. Zimbra is trusted by more than 5,000 companies and government customers, as well as by service providers who manage Zimbra in the cloud for more than 200,000 businesses. Zimbra is the largest provider of open source collaboration software in the world. www.zimbra.com
