

# Zimbra 8.8

## Enterprise Email & Collaboration Platform

### What Is Zimbra Collaboration?

Zimbra, a Synacor product, is an email and collaboration platform that includes contacts, calendar, tasks, instant messaging, and file sharing, plus add-ons such as video calls, document creation and file storage. Zimbra powers hundreds of millions of mailboxes in 140+ countries and is offered through more than 500 BSPs and 2000 channel partners. Enterprises, governments, and service providers trust Zimbra.

Zimbra can be deployed in the cloud, on-premises (private cloud), or as a hybrid service.

### Key 8.8 Features

Zimbra Collaboration 8.8 includes powerful new technology and enhancements that make this the most competitive version of Zimbra yet, while still continuing to deliver on our consistent strengths of:

- Lowest TCO in the industry
- Best-in-class security and privacy
- Most diverse deployment options
- Greatest extensibility of any email platform

### Zimbra Connect

Zimbra Connect licenses can now be purchased on a per user basis for Zimbra Network Edition: bringing enterprise-level chat and video calls right into the Zimbra Web Client, with no third-party products and simple installation.

Zimbra Connect gives you:

- 1:1 & group chat
- Group & channel video calls
- File sharing
- Screen sharing
- Emojis

And at the Corporate-level, Zimbra Connect provides:

- Corporate messaging (via spaces & channels)
- Channel video calls with unlimited participants

# Zimbra Collaboration 8.8

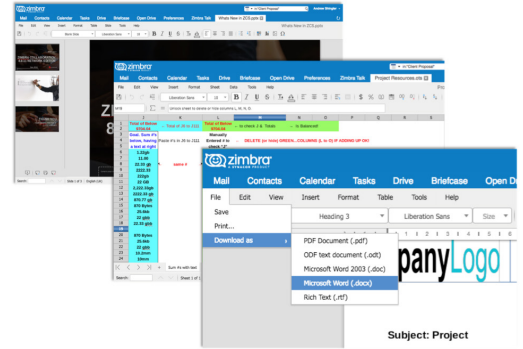

## Zimbra Drive

Out-of-the-box, enterprise-level file sync and share functionality built into Zimbra. Is your data at risk of leakage? Are your privacy policies enforced? Zimbra Drive is integrated with Zimbra Docs and provides your users with a single, secure access point for data, all stored on your servers to meet your data sovereignty, security and privacy requirements. Zimbra = peace of mind!

## Zimbra Docs

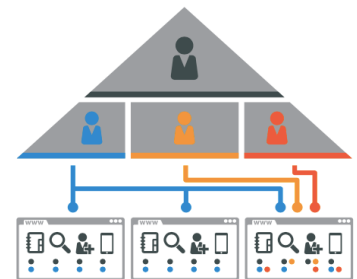

Zimbra Docs is a complete, feature-rich office productivity suite integrated right into your Zimbra Web Client ... at no extra charge in Zimbra Network Edition. Create, edit upload and export documents, spreadsheets and presentations right in Zimbra – in any format you need — without a Microsoft Office license. AND share any file to collaborate in realtime!

## Mobile Sync

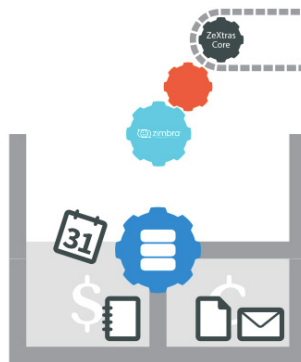

What's new about Zimbra's mobile sync functionality? Users can now sync their shared Zimbra items along with all of their other

Zimbra data. Using Exchange ActiveSync protocol, which is natively supported by the vast majority of mobile devices, your data will always be at your fingertips, without any middle-ware or dedicated client.

## HSM

Featuring advanced Zimbra store management and HSM, you can now manage multiple volumes and HSM policies through your Zimbra Administration Console. Save up to 50% of your valuable storage space, easily expand your Zimbra server by adding new volumes at will, and improve your server performance by splitting the I/O load onto different storage media and different tiers of storage equipment.

## Delegated Admin

Grant Delegated Admin rights to users in minutes, allowing them to perform management tasks like setting quotas, COS and user limits for your domains. Keep track of Delegated Admins' actions and your domain status with reporting features straight from your Zimbra Administration Console.

## Realtime Backup and Restore

Zimbra's realtime backup and restore engine backs up every single item and event on your server with split second precision. It's designed to avoid data loss using atomic and ever-consistent algorithms, while still saving disk space — up to 50% — thanks to an intelligent deduplication and compression system. It offers six restore features, all transparent to the end-user and 100% OS, architecture and version independent.
